PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	Earlier, the work was done on multi-product continuous review inventory system with stochastic demand, backorders, and a budget constraint and also when the demand was considered to be a constant. I appreciate the authors for proposing a new probabilistic multi-item inventory model by modeling the variable demand rate using appropriate probability distribution functions.	
Minor REVISION comments	The author(s) are requested to take care of the Typographical errors throughout the manuscript.	
Optional/General comments
