PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The manuscript is well structure and provide useful information for rice wheat cropping system. But I have some suggestion for the author to consider as: The author should review specific review for each components under various resource conservation technologies. For instance, Author should summarize his/her own review on each topic such as SRI can increase nutrient efficiency by utilizing resource efficiently etc. Introduction should be compact as a character of overview somehow compact structure to attract reader's interest because most of the readers are not basic level. Therefore, I suggest author to summarize some detail information in the introduction and analyse some data from the references.**	
Minor REVISION comments	Table caption should be the above of the table and be careful in using abbreviation. Please review some text in the table components.	
Optional/General comments	Overall good
