### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalmrji.com/index.php/MRJI/editorial-policy>)

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"><li>A revision is required.</li><li>Various technical questions are present in the manuscript to be answered and grammatical changes are needed.</li><li>Please find the attached manuscript with my suggestions.</li></ul>	Revision done
<b>Minor</b> REVISION comments	Grammatical corrections can make the script more interesting. You could think about renaming the table titles and terminologies.	Revision done
<b>Optional/General</b> comments	I appreciate the efforts made by the authors. Both, the topic and data are very good however I think authors should seek help in writing the manuscript from someone more experienced in writing or in other words with a better English writer. This is completely understandable that English is not the first language in the country of the authors so I would especially like to mention that authors should not get demotivated by critical comments. Also collaborating with a mentor could be a good approach to make this paper publishable.	Revision done

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
