

**Editor's Comment:**

In the Introduction section:

-page 2 (final paragraph) and page 3 (the first two paragraphs), where data from the literature is presented: please reformulate by specifying the author/country/year/type of study.

In the Presentation of case section:

-the author should specify the clinic where the described interventions took place, and the time as well

-Figures should be cited in text correspondingly

In the Discussion section:

-please include more comparisons with similar studies in the literature

The Conclusions section:

-final paragraph: please consider "if used" instead of "is used"

Please consider "Consent" instead of "concent".

Accepted after the revisions listed under the present Table.
