

## Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_110728
Title of the Manuscript:	Studies on variable level of N fertigation on growth, yield and quality of pomegranate (Punica granatum L.) cv. Kandhari Kabuli
Type of the Article	Research

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments  1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)  2. Is the title of the article suitable? (If not please suggest an alternative title)  3. Is the abstract of the article comprehensive?  4. Are subsections and structure of the manuscript appropriate?  5. Do you think the manuscript is scientifically correct?  6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.  (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	  1. This article is very important to publish, because it carried out experiments on pomegranates (Punica granatum L.) cv. Kandhari Kabuli, where we have not found a dominant finding of this object and it is still rare in the last 2 years 2. For the title that has been reviewed, we will provide an alternative: Nitrogen Fertigation 75% Increases Growth, Yield and Quality of Pomegranate cv. Kandhari Kabuli 3. The abstract is quite good 4. There is still improvement in the structure of the introduction and methods 5. Scientifically it is in accordance with the truth because there are experimental tests carried out before the research results are processed and show 75% nitrogen as fertigation accuracy 6. We have added references that can be used by authors and we have provided a download link.	  Noted
<b>Minor</b> REVISION comments  1. Is language/English quality of the article suitable for scholarly communications?	  Quite appropriate.	
<b>Optional/General</b> comments	The article is worth continuing the process that already exists in this OJS system. We hope that this article is worthy of publication considering the findings and species of pomegranate studied are relatively new	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
