To some extent author emphasised this. However, resettlement and rehabilitation of affected persons/families is also important in land acquisition which seems not highlighted..... Land Acquisition model to be sustainable must have potential to seek participation of affected persons/families i.e land losers by evolving policies to make them partners of development and welfare infrastructure.....this can be suggested as policy feedback.....</p> | Revision made |
| Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications? | <p>Manuscript needs to be revisited for grammatical corrections especially of tense.....as there are many references of year 2017, 2019, 2022 and article is under review in 2023but mostly present tense is used..... when it reaches wider readership.....it needs to be appropriately corrected.</p> | Done |
| Optional/General comments | <p>This case study paper is an excellent analytical manuscript.</p> | Thanks |
