

**Editor's Comment:**

I have some comments:

The abstract is 509 words. It is very large. Also, it is non-structured. Commonly, an introduction, objective, methods results, and discussion.

What was the sampling method?

What was the sample size calculation?

What Ethics Committee approved the project?

**Editor's Details:**

Dr. Nicolas Padilla-Raygoza  
Institute of Public Health from Guanajuato State, Guanajuato, México.
