

Editor's Comment:

1. the syndrom defined by episodes of hematoma on fingers, it is rare and benign
 2. The Title is suitable it is simple and right
 3. pay attention of medical staff for early diagnosis because it is lack of symptoms and clinical implications.
 4. Acceptable
 5. I have a problem with evaluation of pain to 1 year old kid, it's So difficult to appreciate.
Because alchenbacksyndrom is associated to a dolor
 6. acceptable , References already is 10 ,so I think it is enough .
- The image also is very clear so It is a Good paper
- So after mini modification, it can be published.
