More references are needed in “Introduction” section when claiming things. For e.g., The high protein..... commonly consumed pulses. 3. More discussion needs to be done for “test weight for 1000 seeds” under “Results and Discussion” section. 4. Under “Results and Discussion section” you have continuously used the words “significantly higher”; however, you did not explain which statistical analysis method were used. I would suggest doing multiple mean comparison and add this as superscript in the tables and bar graphs.
