But results and discussion section can be divided in to sub sections for readability. Yes The research article provides valuable insights into the cold tolerance abilities of ten boro rice genotypes under controlled laboratory conditions. The study is well-structured, with a clear abstract, introduction, materials and methods, results, discussion, and conclusion. However, there are a few areas where additional clarification and improvements could enhance the manuscript The methodology is adequately described, but it would be helpful to provide more details on the Walk-in cold chamber specifications, including temperature precision and other relevant parameters. It is recommended to include figures that visually represent key findings, such as a graph illustrating the germination percentage under different temperature regimes.
