I like the idea of "ANALYSIS OF LEADING AGRICULTURAL COMMODITIES AND THEIR ROLE IN REGIONAL DEVELOPMENT IN NORTH TAPANULI REGENCY". This has some of merits. However, the paper does not currently meet all standards of the journal and it requires more work and it appears that the paper is more a descriptive analysis. I am outlining my suggestions below in the hope they will be helpful.</p> <p>kind regards</p> <p>ABSTRACT The purpose is unclear and needs rewriting to make it more paper-specific and the researcher did not mention which methodology has been used.</p> <p>INTRODUCTION The derivation of the research gap unclear and seems to base on slightly outdated literature. The discussions here need to be more convincing and stringently focused on the research problem, the contributions, rewriting the introduction as per academic writing. However, I would like to see strong theoretical justification and support from literature about how your study is important at this time.</p> <p>LITERATURE REVIEW This section also needs more writing of the literature and use to resent literature from good journals. You would need to review the literature more in-depth to find literature relevant for your work and to then outline what the gap that you will address is.</p> <p>METHODOLOGY The methodology section should be clearer of the applied research approach. Please respecify how the studies utilized in the analysis were identified. In the general the methodology section is kind of weak something needs many improvements.</p> <p>FINDINGS The findings need to justify your results and link the results with theories and recent studies from good journals.</p> <p>CONCLUSION The paper also needs a more suggestions for further research.</p>	<p>Ok</p> <p>Noted</p>
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>
