

## Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_110784
Title of the Manuscript:	Spatial Assessment and Variation of Soil Physicochemical Properties and Water Quality in the Tungi Watershed of Maharashtra, India
Type of the Article	Original Research Article

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments  1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)  2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)  3. <b>Is the abstract of the article comprehensive?</b>  4. <b>Are subsections and structure of the manuscript appropriate?</b>  5. <b>Do you think the manuscript is scientifically correct?</b>  6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b>  <b><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></b>	<b>I appreciate the manuscript. It is good.</b>  In fact, the researchers were not examined all physicochemical properties. Therefore, the title should be corrected as, Spatial Assessment and Variation of Selected Soil Physicochemical Properties and Water Quality in the Tungi Watershed of Maharashtra, India  The abstract is good, but it is not attractive enough. As a rule, abstract should be written in one paragraph and italic. Forming sub-title in abstract is not smart.  Somewhat appropriate, but different chapters of the manuscript were written on one page.  The statement of problem of the manuscript is unclear. It is not stated well.  The references are so poor. I'm confused with the references writing style the authors used. Which one of styles they used?	Thank you very much  The title of the manuscript must be attractive, writing selected reduces its importance. There are numerous properties, determination of all is not important as per aim of the study.  It is written as per authors guideline  Research is based on soil survey which suggest soil and land resource management for sustainability.
<b>Minor</b> REVISION comments  1. <b>Is language/English quality of the article suitable for scholarly communications?</b>	Check the grammar used	Corrected
<b>Optional/General</b> comments	Soil Physicochemical Properties examined shall be selected one, as far as you could not cover all  Rewrite your abstract in proper way  New chapters should be written on new separate page The authors should state the problem observed in the study area properly  Properly write the references based on guideline
