The article is poorly written in terms of sentence construction and review of literature  2. The plant is very well known and several pharmacognostic and phytochemical studies have already done with this species.  3. There are several spelling mistakes and errors in sentence construction, it seems the authors are not serious to write the article and to communicate in journal  4. The introductory parts should mention the traditional uses of the plants  5. The Result section lacks some technical parts mentioned in the text that needs clarifications  6. The discussion part should be more constructive. In present condition it seems authors are re-validating the results of the other workers for the same plant.	
<b>Minor</b> REVISION comments  <b>1. Is language/English quality of the article suitable for scholarly communications?</b> No		
<b>Optional/General</b> comments
