

## Review Form 1.7

Journal Name:	Asian Journal of Case Reports in Medicine and Health
Manuscript Number:	Ms_AJCRMH_115450
Title of the Manuscript:	Diabetic ketoacidosis revealing adult cystic fibrosis associated with Graves' disease: about one case
Type of the Article	

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments  1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)  2. Is the title of the article suitable? (If not please suggest an alternative title)  3. Is the abstract of the article comprehensive?  4. Are subsections and structure of the manuscript appropriate?  5. Do you think the manuscript is scientifically correct?  6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.  (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	  1. Yes, it emphasizes an early and aggressive treatment when hyperthyroidism associated with diabetes mellitus gets complicated by an infection. 2. Yes. 3. Yes. 4. Unless publishers/ editors recommend, in a Case- Report, exhaustive review of the disease such as cystic fibrosis and Graves' disease may not be required. A brief mention of treatment of CF with CFTR- modulators may be appropriate. 5. Unless some life- saving surgical procedure is required, mere presence of infection in a patient of DM associated with Graves' disease does not make it a surgical emergency. It may be desirable to mention arterial blood pH value when describing a case of DKA. It is not correct that the treatment of DM in presence of Graves' disease is useless. In fact, when an infection has occurred, it should be early and aggressive. Proper nouns may be started with upper case letter and common nouns with lower case. Values may be written with complete unit along with the denominator such as blood sugar in gm/l or oxygen in l/ mt. Glasgow may be written as Glasgow. 6. A software App may be used to check the references.	  4. I've taken your comment in consideration and changed it 5. What was ment is that the thyroid hormones block the expression of the insulin receptors and not that the treatment of diabetes is useless but should be combined with hyperthyroidism treatment I corrected and rephrased that.
<b>Minor</b> REVISION comments  1. Is language/English quality of the article suitable for scholarly communications?	  1. There is a scope to improve the quality of English.	  I've tried to improve the english
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
