<p><u>Compulsory</u> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. The manuscript is important for the scientific community though for an epidemiological study multi-centre study with a higher patient population would have been adequate.</p> <p>2. The title is suitable.</p> <p>3. The abstract is inadequate and does not reflect the study objectives.</p> <p>4. The subsections and structure of the manuscript is appropriate but lacks details. The introduction, discussion and results are inadequate and requires a more detailed overview of the study. There are no tables to illustrate the association analysis between the variables (Pearson's and Fischer's analysis) as mentioned in the materials and methods.</p> <p>5. The manuscript is scientifically correct.</p> <p>6. The references are not sufficient and not even recent.</p>	<p>I tried to improve the summary, and detail the introduction and discussion and I added more references that I consider relevant</p>
<p><u>Minor</u> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		<p>Grammatical corrections have been made</p>
<p><u>Optional/General</u> comments</p>
