Post natal depression</b> Seems to have high incidence in this setup . As far as title is concerned to me it appears to be too straight forward a little unpleasant and if its not too much to say sounds a bit harsh . something like postpartum Depression –an overview Is my suggestion. The abstract is no doubt comprehensive, scientifically correct and is understandable for non medical personal as well. subsections and structure are appropriate As far as references are concerned they are not recent and repeated many times	Noted  Noted and effected
<b>Minor</b> REVISION comments  1. Is language/English quality of the article suitable for scholarly communications?		
<b>Optional/General</b> comments
