<b>Compulsory</b> REVISION comments  1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)  2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)  3. <b>Is the abstract of the article comprehensive?</b>  4. <b>Are subsections and structure of the manuscript appropriate?</b>  5. <b>Do you think the manuscript is scientifically correct?</b>  6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b>  <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	1.Ossifying fibromas is a rare benign lesion of bone and hence any discussion on case presentation and treatment strategy is useful for the medical community  2.Yes. But please re-write the title in APA format i.e. all starting letters of alphabets should be in caps 3. Yes, the abstract is comprehensive and describes the article in brief. 4. Yes, the article is appropriately designed. 5. The manuscript is rational and scientifically correct. But the case report section is too short. The author should discuss the operation strategy, which is of utmost importance; OFs can be managed with different types of operations from enucleation to resection. Hence, discussion of the treatment strategy and follow-up protocol should be mentioned by the authors. 6. References are accurate although few more references while re-writing the management part might be included. Hence, few suggestions are being attached;-  a) Dudeck, D., Warmusz, O., Reichman-Warmusz, E., & Kurtzman, G. M. (2023).
