

Editor's Comment:

The original research manuscript entitled "Assessment of Green Manure Crops and Their Impacts on Mineralizable Nitrogen and Changes of Nutrient Contents in the Soil" submitted to the Asian Soil Research Journal is studied in detail. Both the reviewers critically corrected the original manuscript and their technical comments have improved the manuscript standard and quality.

Observations:

01. The authors have incorporated all the suggestions given by reviewers in the revised manuscript.
02. The manuscript included sufficient data, statistical analysis, and presentation for easy understanding of farming and the scientific community.
03. The present study's results will certainly help to increase soil fertility, improve the soil's physical characteristics, and increase crop yield.

Final Decision: The submitted manuscript should be accepted for publication in Asian Soil Research Journal.
