

Review Form 1.7

Journal Name:	Journal of Complementary and Alternative Medical Research
Manuscript Number:	Ms_JOCAMR_115406
Title of the Manuscript:	Modulatory Functions of Craterispermum schweinfurthi on the Hypothalamic-Pituitary-Gonadal Axis of Male Wistar Rats in Phenyl Hydrazine Induced Testicular Toxicity
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)		
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	<p>The article is of excellent quality. It is a very important topic for the scientific community. The small points I suggest improving are:</p> <ul style="list-style-type: none">- Present an international overview of the theme in the introduction (what was done similarly in other countries, or even what was not done);- Improve the practical implications of the study (How important is the study for society? How important is the study for professionals? How important is the study for the health system? Etc..- I suggest reading the studies cited below, as I believe they can contribute to the introduction and/or discussion of the article and <u>can be cited</u>: ALEXANDRINO, E. G. ; MARCAL, D. F. S. ; ANTUNES, M. D. ; DUMITH, S. C. . Análise de série temporal do câncer de próstata no estado de Santa Catarina - Brasil: subsídios para tomadas de decisões. PANORÂMICA (UFMT. PONTAL DO ARAGUAIA), v. 36, p. 1-15, 2022. <p>https://periodicoscientificos.ufmt.br/revistapanoramica/index.php/revistapanoramica/article/view/1525</p>	<p>Introduction formatted to reflect direct benefit of the study to mankind: Such a growing interest in medicinal plants including <i>Craterispermum schweinfurthi</i> has inspired scientists to clarify their effects in fertility studies as such interventions would serve as possible beneficial alternatives to mankind against the already existing orthodox medications.</p> <p>The English version of the suggested article could not be accessed. Only the Portuguese version is available online, and I don't understand the language, so it would be difficult to reference the article appropriately.</p>
Optional/General comments
