# **Review Form 1.7**

Journal Name:	Asian Journal of Research and Reports in Endocrinology
Manuscript Number:	Ms_AJRRE_115823
Title of the Manuscript:	Pancreatic Fat Accumulation: A Link to Pre-diabetes and Diabetes Mellitus
Type of the Article	Original Research Article

Created by: DR Checked by: PM Approved by: MBM Version: 1.7 (15-12-2022)

## **Review Form 1.7**

#### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		The result of th
Is the manuscript important for scientific community?  (Please write few sentences on this manuscript)	Yes, it seeks to clarify the correlation between a fatty pancreas and metabolic parameters. By exploring the relationship between pancreatic steatosis and pancreatic tissue damage, it aims to gain insights into its role in the development of diabetes mellitus.	
2. Is the title of the article suitable? (If not please suggest an alternative title)	I would prefer Pancreatic Lipid Deposits: There is a Connection to Pre-diabetes and Diabetes Mellitus?	
3. Is the abstract of the article comprehensive?	Yes	
4. Are subsections and structure of the manuscript appropriate?	Yes	
5. Do you think the manuscript is scientifically correct?	Yes	
6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.		
(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)		
Minor REVISION comments		
Is language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	Some research studies have suggested that weight loss and drug therapy may contribute to the	
	reversal of pancreatic steatosis (References?)	
	The relationship between dyslipidemia and steatopancreatitis is complex. While some studies have indicated a correlation between pancreatic steatosis and elevated triglyceride levels, our study did	
	not reveal such a relationship(15). The reference should be after levels, not at the end.	
	F(13).	
	Some studies have suggested that higher alcohol consumption is associated with increased	
	pancreatic fat content(14) add Criddle DN. The role of fat and alcohol in acute pancreatitis: A	
	dangerous liaison. https://doi.org/10.1016/j.pan.2015.02.009	
	The first table should have a key about the meaning of the symbol ± standard deviation or other
