

Review Form 3

Journal Name:	European Journal of Medicinal Plants
Manuscript Number:	Ms_EJMP_121049
Title of the Manuscript:	Chemical Composition and Oxidative Properties of Moringa peregrina Dried-Ground Parts Extracted with Different Solvents
Type of the Article	Original Research Article

[Review Form 3](#)

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	It is standard enough. The manuscript can have a good contribution in the said field SEE MANUSCRIPT	Noted
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, it is	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, the abstract of the article is comprehensive.	OK
Are subsections and structure of the manuscript appropriate?	Yes, all the subsections and structure of the manuscript are appropriate.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript seems to be technically sound and robust from a scientific standpoint for a number of reasons. First , a thorough understanding of the many bioactive chemicals contained in Moringa peregrina can be obtained by applying a systematic approach to chemical composition analysis using a variety of solvents. Second , analyzing oxidative characteristics adds a crucial component that aids in determining the extracts' stability and possible health advantages. Furthermore, the dependability of the results is increased by the use of dried-ground pieces, which provide consistency in sample preparation. These elements work together to strengthen the manuscript's technical validity and level of scientific rigor.	Effectuated revision
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes, it is.	Thanks
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes, it is.	
<u>Optional/General</u> comments	Manuscript should rectify as per the given suggestions.	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
