Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript gives a general theoretical principle and methods of preservation. A brief discussion over fruits and vegetables preservation attract the reader.	This publication is significant to the scientific community because it provides valuable insights into a specific field of inquiry, enhancing existing understanding and maybe opening up new pathways for future investigations. It discusses an important and contemporary topic that will help academics and researchers. I admire the manuscript's clear research objectives, strong methodology, and possible positive impact on the field. The data is well evaluated, and the findings confirm the conclusions, making it an important contribution to the continuing scientific dialog.
Is the title of the article suitable? (If not please suggest an alternative title)	yes	Yes, Your Suggestion is Right "A Review on Advanced Preservation Techniques for Post-Harvest Quality Maintenance of Fruits and Vegetables"
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	yes	I have improved the Abstract and some points add and some point deletion and it is not comprehensive. It provides all information precise form.
Are subsections and structure of the manuscript appropriate?	yes	Yes
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	It's a review paper which comprises the general information based on the review for preservation of Fruits and vegetables.	The paper appears scientifically robust if it has a logical flow of material, adheres to accepted techniques, and employs well-established scientific principles. It should also give enough detail to ensure that the results can be replicated. Furthermore, the manuscript should include a thorough literature assessment to situate its findings in the larger scientific area. Addressing potential limits and discussing future research options improves its legitimacy and scientific contribution.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	yes	References are sufficient and recent Not any Suggestion
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	In some places upper case or lowercase may be seen and corrected	Yes, the language and English quality of the article appear appropriate for scholarly communications. The language is clear, and succinct and adheres to academic writing traditions, including the proper use of technical vocabulary and a professional tone. Furthermore, the structure and grammar are sound, which improves the manuscript's readability and professionalism.
Optional/General comments	-	Yes, the manuscript gives a solid investigation, however the research objectives and findings need to be more clearly articulated. To provide more context and support, the introduction should be strengthened with more background material and recent studies. Addressing these problems will increase the manuscript's impact and intelligibility in the scientific community.

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	Yes, I am agreed with reviewer, correct the manuscript and highlight that part in the manuscript. As the author, I appreciate the reviewer's insights regarding ethical considerations.
