

**Review Form 3**

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_123723
Title of the Manuscript:	Formulation and Evaluation of Weaning Foods Prepared From Multigrain Flour and Powdered Milk
Type of the Article	Original Research article

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The article addresses an important aspect of food technology; which is the formulation of complementary foods based on local ingredients. Quite important results have been obtained and discussed. However, the author has not indicated the methods for the physicochemical analysis of the formulated foods.	Now the methods of physicochemical analyses have been added under the heading Materials and methods.
Is the title of the article suitable? (If not please suggest an alternative title)	No, Formulation of low-cost weaning foods prepared from multigrain flour and powdered milk	Title has been modified.
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	No, also indicate the main results of the physicochemical analyses of the formulated weaning foods:	Results of physic chemical analyses have been added in the abstract.
Are subsections and structure of the manuscript appropriate?	make some rearrangements (see the proposals made in the manuscript)	Structure has been rearranged.
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The results obtained are applicable and allow to solve the problems of malnutrition during or after weaning that affect households by using local foods at lower cost on the market. The results are reproducible and can be adapted in any circumstance	Results obtained are reproducible and have significant importance due to the fact that they can help in reducing the malnutrition in children
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	50% of the references are less than 10 years old and provide information that is current. This number could be revised upwards	The number of recent references have been increased
<u>Minor</u> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	OK	
<u>Optional/General</u> comments	include the results of the statistical analyses in the manuscript	Result of statistical analyses have now been added to the manuscript.
