Title of the Manuscript:	COMPARISON OF HEALTH CONDITIONS BASED ON DEGENERATIVE DISEASES IN RURAL AND URBAN ELDERLY
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript provides valuable insights into the similarities in health conditions related to degenerative diseases among elderly populations in both rural and urban settings. By demonstrating that health outcomes in these areas are comparable, the study challenges assumptions about access-related health disparities and highlights potential common factors affecting elderly health across different environments. I appreciate the manuscript's emphasis on these shared challenges, as it suggests that universal interventions may be effective across regions. This could streamline healthcare planning and resource allocation, making it relevant for policymakers and healthcare providers alike and government efforts.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract should be rechecked and edited because didn't include conclusion and recommendation, Also, researcher write it in present simple. Also, it include more than 260 words	
Are subsections and structure of the manuscript appropriate?	Research methodology not completed should include(design, describe setting, participants, field work how collect data and the duration of it, and describe tool used during interview with participants). In addition, explain why the researcher choose participants (44 respondents from Tiong Ohang Village, Long Apari District, Mahakam Ulu Regency, and 44 respondents from Samarinda City), research hypothesis Write statistical analysis in separate There are several types of degenerative diseases but researcher choose 2 types only. It is related to research finding or what? Result and Discussion: should beginning with sociodemographic data for participants , test uses (paired t test) not correct Do the elderly in the countryside benefit from the program as much as the elderly do in urban areas, and are there any obstacles? Recommendation: According to findings, there aren't a researcher's recommendations. Research limitation and strength not found	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is good related to its idea but want major modifications	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Some references are very old. It is better to update it	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The researcher should make editing and check grammar for the manuscript	
Optional/General comments
