PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript on the physico-chemical and sensory characterization of biscuits enriched with avocado pit flour appears to be a valuable contribution to food science, particularly in the context of utilizing underused resources like avocado pits. I appreciate the innovative approach to reducing food waste by incorporating a byproduct into a commonly consumed product like biscuits. The study's focus on both the physical and chemical properties, alongside sensory evaluation, provides a comprehensive understanding of the potential of avocado pit flour in food applications. However, the success of such studies largely depends on the clarity of the methodology and the relevance of the findings to broader food production and consumer acceptance. If these aspects are well-addressed, the manuscript could significantly contribute to sustainable food practices.	Okay
