Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.		
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	<p>Reviewers comments:</p> <p>The author has identified a good and interesting topic for the study. However, it is observed that the author has depended heavily on secondary data. It is a known fact that the Indian Census was held in 2022. However, if the study included primary data , the study would have been significantly better.</p> <p>A research study requires objectives , based on which the hypothesis is framed. This does not seem to be visible in the manuscript.</p> <p>When the hypothesis is tested using statistical analysis, the outcome of the study becomes justified and clear. Therefore, it would help the author to work on this suggestion.</p> <p>Grammatical errors need to be addressed.</p>	The data included in manuscripts , that are secondary data and it's a review article. So research objectives, methodology, hypothesis are not including here.
