

Review Form 3

Journal Name:	Asian Journal of Advanced Research and Reports
Manuscript Number:	Ms_AJARR_126939
Title of the Manuscript:	Optimizing Emergency Response: Strategies Studies for Enhancing Hospital Management for Traffic Accident Victims
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript holds significant importance for the scientific community as it addresses critical aspects of emergency response and hospital management for traffic accident victims. By optimizing strategies, it has the potential to improve patient outcomes, reduce mortality rates, and enhance resource allocation during emergencies. The study provides valuable insights into the efficiency and effectiveness of hospital protocols, which can guide policymakers and healthcare professionals in refining their practices. I appreciate the manuscript's focus on a pressing global issue, although it could be strengthened by including a broader analysis of diverse healthcare settings to ensure the findings are widely applicable..	
Is the title of the article suitable? (If not please suggest an alternative title)	Optimizing Emergency Response Strategies for Effective Hospital Management of Traffic Accident Victims	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	<div>1. The conclusion restates points mentioned in the background, which could be streamlined to avoid repetition</div> <div>2. Including a brief mention of specific strategies suggested for improving response times and care quality could make the abstract more actionable</div> <div>3. Correct minor errors and spacing issues</div>	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript appears scientifically robust and technically sound due to its well-structured mixed-method design, which allows for a comprehensive exploration of hospital management strategies. The use of multiple data collection techniques, such as direct observation, in-depth interviews, and documentation analysis, enhances the reliability and validity of the findings. Additionally, the thorough analysis of data using both descriptive statistics and thematic analysis demonstrates a methodologically rigorous approach that ensures the research findings are well-founded and insightful.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	yes	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	the article provides a valuable and comprehensive analysis of hospital management strategies to improve emergency response for traffic accident victims in Indonesia. By utilizing a mixed-method design with a sequential explanatory approach, the study effectively combines quantitative and qualitative data, offering in-depth insights into the complexities of emergency care
