<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is important to the scientific community because it reveals teacher learning practices and metaphors that impact teaching effectiveness. These findings are useful for policy makers to support teacher professional development and improve the quality of education in the future.	We are thankful for your comments.
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title of the article suitable, but maybe you could add "influence or correlation" between the sections in the research. example: "Correlation of instructional practices and learning metaphors among language teachers in public secondary schools"	We are thankful for your comments. Thank you for your insightful feedback. I understand the suggestion to enhance clarity by adjusting the title. However, I feel that the current title already effectively conveys the main focus of the study.
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Briefly and clearly describe the results of this research, including the specific correlation values, then add the conclusions of your analysis. What are the implications of this research and what is its concrete implementation?	We are thankful for your comments. We have thoroughly revised the paper as suggested.
Are subsections and structure of the manuscript appropriate?	Customize with the journal template.	We are thankful for your comments. We have thoroughly revised the paper as suggested.
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is scientifically sound because it uses a non-experimental correlational research design appropriate for testing the relationship between variables. Statistical tools such as mean, Pearson r, and regression analysis make data analysis more reliable. Additionally, a representative sample increases the generalizability of the results, so the manuscript is technically solid and supports its conclusions.	We are thankful for your comments.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	The references used are too old, perhaps less relevant to current educational developments. It is best to use references from relevant scientific articles that are less than 10 years old, except for original books that have not yet been printed.	Our citations are within the 10-year limit, as reflected in the references section. If you are referring to the publication years of foundational theories, please note that these years cannot be modified, as they reflect the original dates of the theories. Thank you for your understanding.
