

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Probability and Statistics
Manuscript Number:	Ms_AJPAS_125479
Title of the Manuscript:	OPTIMIZATION OF EXPERIMENTAL PARAMETERS IN THE BUILDING CONSTRUCTION PROCESS WITH FRACTIONAL FACTORIAL DESIGN AND RESPONSE SURFACE METHODS
Type of Article :	Research

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I appreciate that the authors have corrected the issues in the revised manuscript. I recommend that the authors add details about the <b>asterisk (*) sign</b> , which is available in <b>Table 3</b> , and in the last <b>formula of Compressive strength</b> . However, I <b>didn't find the novelty</b> of the manuscript. In my opinion, authors should add some more technical content in such a way that the quality of work will be enhanced and more sound.	The asterisk (*) sign in table 3 and the formula of compressive strength is a multiplication sign showing the multiplication between interaction effects
