PART 2:

FINAL EVALUATOR’S comments on revised paper (if any)	Authors’ response to final evaluator’s comments
I appreciate that the authors have corrected the issues in the revised manuscript. I recommend that the authors add details about the asterisk (*) sign , which is available in Table 3 , and in the last formula of Compressive strength . However, I didn’t find the novelty of the manuscript. In my opinion, authors should add some more technical content in such a way that the quality of work will be enhanced and more sound.
