

Editor's Comment:

Accepted after the revisions listed under the present Table

Revisions recommended:

- please provide the number of ethical approval from the institution
- please mention if written informed consent was obtained from the parents prior to the intervention (and also for case publication)
- Case Report section – please consider removing the term “primary” from the paragraph referring to teeth 55, 65, 36 and 46
- please mention in text the application of stainless-steel crowns on 55 and 65 (as indicated in Fig. 3c)
- Figure 3c is placed upside down, please correct this
- Discussion section – the first phrase is repeated further down in the same section – please remove repetition
- the Conclusions should refer more to the presented case, and less to general aspects
- all the references included in the References section must be cited in the text. The References must be written and numbered in the order of their appearance in the text
- the manuscript needs minor English correction.

The main problem is that the Authors did not mention having obtained written informed consent from the parents prior to the intervention, or for case publication. The number of ethical clearance form the institutional board must be mentioned, too.
