

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_126203
Title of the Manuscript:	DNA Barcoding assisted authentication of polyherbal formulation – Triphala
Type of the Article	Original Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer’s comment	Author’s Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Authentication procedure should be done before preparing formulation. Good work but should be need more clarity of work. Add more standardization techniques for identifying adulteration of a formulation.	Thank you for your valuable feedback. The standardization with the designed primers can be done effectively to authenticate the species before the formulation is prepared as well as to screen the commercial Triphala samples for quality assurance.
Is the title of the article suitable? (If not please suggest an alternative title)	No	The title of the manuscript is revised. Thank you for your valuable feedback.
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	Thank you for your positive feedback.
Are subsections and structure of the manuscript appropriate?	Appropriate. Discussion should be in separate section	The separate and detailed discussion section was added as per your valuable suggestion.
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Authentication procedure should be done before preparing formulation. Technique is absolute one. As a formulation it should correlate with the other standardization technique.	<ul style="list-style-type: none">Thank you for your valuable feedback. The standardization with the designed primers can be done effectively to authenticate the species before the formulation is prepared as well as to screen the commercial Triphala samples for quality assurance.Other standardization techniques such as HPLC was also carried out. That part is under consideration for publication in a separate manuscript.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	Reference needs to be add in discussion section.	Thank you for your valuable suggestion. The correction is made accordingly in the manuscript.

Review Form 3

Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	Thank you for your positive feedback.
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	No
