(If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	yes no. A study of Enzyme Aromatase concentration level in Women in Port Harcourt. Yes Yes Yes yes	Thank you for your suggestion. I think we are Okay with the topic used ab initio because it helps us define the area of the study and the class of subjects were working on. Just to avoid ambiguity.
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	yes	
Optional/General comments	Overall article is good and well prepare. I have only doubt about sample size. If its more so its better reflect in study. And also correlate with BMI and other parameter like fat%, visceral fat% , metabolic age etc.	Thank you. Our focus was basically on aromatase in these subjects.

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details) Yes, because blood samples and medical history of subjects were collected.
