

Editor's Comment:

Regarding the above-sent paper:

I consider that it is a Ph. D. Thesis Report , taking into account not only the length, but the existence of a summary of the problems to be exposed.

Therefore, please ask the author if he can structure the paper:

Abstract, Introduction in the problem; The literature liview; Methodology; The exposure in detail of the problem; Findings; Conclusions and References.

The entire paper is 20 pages maximum.

I think that in a week this required form is able to be performed and after a quick revision, ok maybe trusted.

The paper sent, the can prepare two interesting materials to be published.
