

Review Form 1.7

Journal Name:	Asian Journal of Soil Science and Plant Nutrition
Manuscript Number:	Ms_AJSSPN_108739
Title of the Manuscript:	Evaluation of methods of adding chitosan and potassium silicate on some soil fertility and cowpea plant productivity
Type of the Article	Review Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	 1. Yes 2. Yes, please include scientific name of cowpea. 3. Yes 4. Yes 5. Yes 6. Yes Scientific name of cowpea in this study should be mentioned. Be consistent whether it should be: a) cowpea or Cowpea b) chitosan or Chitosan c) potassium or Potassium There should be spacing after comma and full stop, and before in-text citation. 'Astatically Analysis' should be 'Statistical Analysis'. Results and Discussion: Table number should not be bracketed. Table 2, Table 3, Table 4, Table 5, Table 6, Table 7 & Table 8: Mean of 15, 30 and 45 N rates for each treatment is meaningless. This should be removed. Indentation for second line of each reference is not standardised.	Rebised
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	Writing should be concise and straight to the point. Example in first sentence of abstract: This work aims to study the evaluation of two methods applied for Chitosan and potassium silicate under irrigation water periods 10, 15, and 20 days on some soil fertility and cowpea productivity. Should be more concise as follows: This work aims to evaluate two methods of Chitosan and potassium silicate application in 10, 15, and 20 days water irrigation on soil fertility and cowpea productivity.	Corectde
Optional/General comments	This manuscript should be sent for language check before fit for publication.
