(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The following are my review points for the manuscript given to me.</p> <p>The manuscript contains the contents appropriate for the scientific community and an exploratory study. Title is very suitable to the manuscript content. Contents of the abstract may be reduced and the results are not depicted in it. Introduction is too long and needs to be shortened. There is repetition of same issues and sentences in results and discussion parts and it needs to be limited. Sample size of 15-35 years were selected and results shows between 12-50 years age group. Required clarification on the issue. Distance and time consumption to reach health facility would be ideal than just distance alone. Conclusion and recommendation section requires to limited to few words rather than too long. The font size is not uniform throughout the manuscript. Editing of sentences and words required in results and discussion section. The manuscript is suitable for publication after correction and clarification.</p>	<p>Revision made</p> <p>Done</p>
<p><u>Minor</u> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		
<p><u>Optional/General</u> comments</p>
