

**Editor's Comment:**

Regarding the paper sent:

1. The Abstract to be written as a narrative presentation, without pointing out each part of the paper.
2. It needs a Findings chapter, which starts with the beginning of part 4, until ..state strongly ties with student participation in mathematics learning and educational achievement.
3. After that begins part 5, Conclusions, from Understanding....
4. The references require that the publishing year be immediately after the author (s) name (s). Abdullah et al (2012), Heng K. (2014)... Tomaszewski et al. (2020).

After these corrections, ok for publishing.
