

Editor's Comment:

I have finished the revisión of the attached files and I make the next considerations:

1. The title of the manuscript correctly reflects its content.
2. The authors review and update the topic.
3. The bibliography is extensive and up-to-date, but lacks a uniform format.
4. Typographical errors persist in the text
5. The manuscript can be accepted for publication after correcting the mentioned deficiencies.

Editor's Details:

Dr. Juan Carlos Martín del Olmo
Medina del Campo Hospital, Valladolid, Spain.
