

Review Form 1.7

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_111412
Title of the Manuscript:	Study the quantitative characters effect of zinc application on Soybean, Glycine max L., Merrill crop
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. 7. Article writing flow	<p>The title of this research is interesting, because Zn is a micronutrient that is rarely used</p> <p>I suggest the title: The effect of various doses of Zinc on the growth and yield of Glycine max,L soybean plants. It is better to state what type of soil is used</p> <p>The abstract briefly explains the flow of our research. The abstract briefly explains the background, time and place of the research, research methods (parameter analysis and data analysis) and the design used, as well as the research results. There is still a lack of methods, research designs, tools and parameter analysis and data analysis. please add</p> <p>yes</p> <p>Please complete it as suggested in the abstract, regarding the contents there are several things that must be added according to the suggestions</p> <p>Reference please use articles from the last 10 years, because there is a lot of the latest information about Zn, soybean plants</p> <p>The background explains the soil conditions on the research land and the soil chemistry problems, the obstacles to cultivating soybeans on the land, the solution with the addition of Zn microfertilizer. Research methods include the tools and materials used, research design and data analysis.</p>	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	yes	
Optional/General comments	The article is revised according to the suggestions given so that it is in accordance with scientific communication	

Review Form 1.7

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
