Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	Yes. I think that the author could be more careful not to repeat words in the title. Not mandatory, but I suggest to rephrase to: Machine Learning Models for Prediction of Meteorological Variables for Weather Forecasting Yes, the abstract is fine. However, I have provided few suggestions in the main article. Yes, but attend to: The author included some spacing after the Headings and Subheading, but this is not the case for others, please be consistent. Adjust Table and Figures to fit on a page, including their captions. Example is Figure 3. Also, under Heading 4: Summary and Conclusion, its not clear which one is a summary and which one is conclusion. The author can make subheadings accordingly. Yes the manuscript is correct and the referencing are recent. I would have liked to see more explanations of the Tables, especially the Figure (scatter plotters and time series).	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	It is, but it requires a bit of proof reading. For example, is the manuscript in UK or US English? The manuscript should be in one single English language type. Also avoid unnecessary spaces in between words throughout the manuscript.	
Optional/General comments	See suggestions in the main article.
