

Review Form 1.7

Journal Name:	South Asian Journal of Research in Microbiology
Manuscript Number:	Ms_SAJRM_111772
Title of the Manuscript:	The dysregulation of Cyclin Dependent Kinase Regulators Role in SV40 Related renal cell carcinoma
Type of the Article	Review Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	<p>Yes.</p> <p>Yes. Give a short-running title also.</p> <p>Yes.</p> <p>Yes, but the result section should contain at least a para of sentences explaining your result. The methodology section is missing in the manuscript but are found in abstract. This manuscript is mentioned as review but buy the way it is presented it looks as a research.</p> <p>Yes, but the manuscript is marked as a review but inside it contains the data of research. Introduction should contain a para regarding what research or your review states.</p> <p>Yes, but 90% of the references are old. The manuscript should contain 70% of the references of past 5 years and not below that.</p>	<p>1-Yes (A published manuscript describing research findings allows others to learn from and expound on the information so that society ultimately benefits. Preparation of a manuscript for publication requires much time and careful consideration)</p> <p>2-Yes (the role of Cyclin Dependent Kinase Regulators in SV40 of renal cell carcinoma patients).</p> <p>3-Yes.will add</p> <p>4-Yes</p> <p>5-Yes</p> <p>6- Regarding references, there is very little research studying the relationship SV40 polyomavirus infection with renal cell carcinoma,</p> <p>As for ancient references, I did not find modern research related to my research</p>
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	<p>Grammer corrections required, spelling mistakes and extra spaces are found between the words.</p>	<p>Done correct</p>
Optional/General comments		

Review Form 1.7

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	The issues in medical ethics often involve life and death. Serious health issues are raised over rights of patient, informed consent, confidentiality, competence, advance directives, negligence, and many others. Ethics deals with the right choices of conduct considering all the circumstances. Ethics agreement was acquired from local medical ethics committee at Jabir Ibn Hayyan University for Medical and Pharmaceutical Sciences, Faculty of Medicine, Iraq.
