Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><u>Compulsory</u> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Needs revision. Section and subsection numbers are not given.</p> <p>Needs revision. More discussion is needed on practical applications.</p> <p>Yes.</p> <p>1. The introduction needs revision. Merge the related paragraphs in Introduction and limit total number of paragraphs to 4 (Maximum). The way the authors have written the Introduction does not look suitable. A systematic flow must be maintained in Introduction.</p> <p>2. Authors should use [] instead of () for citation. () are basically used for equations.</p> <p>3. Authors have written both AI & ML terms throughout the manuscript, which technique is used in this work? Don't use both the terms at a time.</p> <p>4. Literature survey is properly done. Another section may be added for Literature Survey.</p> <p>5. The methods that are adapted till date, and the possible methods must be discussed properly to define the PROS and CONS.</p> <p>6. Which factors are important to provide the Anesthesia and which model works better in this scenario must be added?</p> <p>7. Related works, in terms of success rate, accuracy etc must be presented in a Tabular form for easy analysis by the readers. By analysing the present scenario, authors may draw the PROS and CONS.</p>	<p>Acknowledged.</p> <p>Acknowledged. The relevant changes have been made.</p>
<p><u>Minor</u> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p><u>Optional/General</u> comments</p>	<p>Authors are advised to be specific while writing medical issues related research papers with proper documentations.</p>
