EDITORIAL COMMENT’S on revised paper (if any)	Authors’ response to editor’s comments
<p>The title of the manuscript is not appropriate. It should be: "Antibiotic sensitivy of pathogenic bacteria associated with subclinical mastitis of dairy cows in the Poro Region of the Ivory Cost"</p> <p>By the way there are a lot of writing errors specifically the name of the microorganisms for instance Escherichia Coli, the species name of the bacteria will not be capitilized (correct writing <i>Escherichia coli</i> this is a basic knowledge for undegraduate students!). Or the name of the medium used for the isolation of the microorganisms i.e. Baird-Parker not Baird Packer etc.</p> <p>There is no refrences given for the bacteriological analysis and CASFM is not a widely used international test for antimicrobial sensitivity testing</p>	<p>Your observations have been well received and we have taken note of where the corrections have been made in this direction. However, we remain tuned for further information.</p>
