

Review Form 1.7

Journal Name:	Chemical Science International Journal
Manuscript Number:	Ms_CSIJ_111369
Title of the Manuscript:	Phytochemical and Bioanalytical prospecting of <i>Murraya koenigii</i> leaves and exploring its Pharmaceutical properties
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p><u>Compulsory</u> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>It is good scientific study but it needs minor corrections:</p> <p>1- There is no clear explanation for Method in ((Separation and identification of bioactive compounds of curry leaves)).</p> <p>2- There is no explanation of result in table (2).</p> <p>3- also type of solvents in TLC, according to what? polarity or molecular weight?</p> <p>4- There is no clarification of result of ((Fig. 4. GC-MS chromatogram showing the peaks of compounds))</p> <p>5- I accepted it after corrections</p>	<p>1) Since the TLC and GC-MS are common and widely used analytical techniques, descriptive explanation of methods is not necessary.</p> <p>2) It is given before the Fig. 2.</p> <p>3) It has been already mentioned in the text about the utilization of Chloroform:methanol solvent as mobile phase. More information on the basis of separation of compounds on TLC has been added.</p> <p>4) The explanation of identification of compounds based on peak values has been modified and re-written for clarity.</p>

Review Form 1.7

Minor REVISION comments		
1. Is language/English quality of the article suitable for scholarly communications?	good	
Optional/General comments	I accepted it after corrections	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	Since the study did not involve any human or animal experiments, the ethical clearance was not insisted.
