

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_111314
Title of the Manuscript:	Integrated Management of Fusarium wilt of Chilli caused by Fusarium solani
Type of the Article	

## Review Form 1.7

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments  1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)  2. Is the title of the article suitable? (If not please suggest an alternative title)  3. Is the abstract of the article comprehensive?  4. Are subsections and structure of the manuscript appropriate?  5. Do you think the manuscript is scientifically correct?  6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.  <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	<p>Yes, it is important as it provides additional knowledge for sustainable production</p> <p>"Yes, it is, but enhancement may be considered by adding the chili variety and scientific name: 'Integrated Management of Fusarium Wilt in Chili Pepper (Capsicum annuum) Induced by Fusarium solani.'"</p> <p>No, including the objective of the study may be considered</p> <p>No, Conclusion maybe presented in separate section and not in Results and Discussion However, if the journal format does not require section of conclusion, it is appropriate.</p> <p>Yes, it is.</p> <p>Yes, it is sufficient and recent except reference number 29.</p> <p>You may consider these following comments:</p> <ol style="list-style-type: none"><li>1. General and specific objectives may be added to the last part of your introduction.</li><li>2. Please include the evaluation of growth parameters in your objectives.</li><li>3. Materials used in the study may be mentioned in the Material and Methods.</li><li>4. The formula for computing Percent Inhibition may be presented in the methodology.</li><li>5. The process for the preparation of the extract and application of treatment may be added to your methodology.</li><li>6. The results with significant findings may be further analyzed using LSD or Tukey's HSD.</li><li>7. In your tables, please use asterisks (*) to denote data with significant results and "ns" for non-significant results.</li><li>8. Statistical analysis of growth parameters may be presented in your results and discussion.</li></ol>	<p>Included the scientific name of the crop.</p> <p>Objective of the study was added</p> <p>Conclusion was presented separately</p> <p>It is a standard reference for using that particular software hance cannot be altered</p> <p>Main objective has been given which clearly defines the entire work Growth parameters were included in the objective Formula for percent growth inhibition was included</p> <p>All the invitro studies were analysed using CRD And pot experiments were analysed using RBD</p>
<b>Minor</b> REVISION comments  1. Is language/English quality of the article suitable for scholarly communications?	Yes	
<b>Optional/General</b> comments	None
