

Editor's Comment:

1. The Abstract should be a narrative form. Starting with the importance of the issue, methodology and examples to clear answers, if it's possible regarding the juvenile problem in Nigeria.

2. Indeed, the structure of the paper is not according to the rules. This means, Introduction; Literature Review; Methodology; extensive presentation of the subject, including the parts already existing in the paper; Results; Conclusions and Recommendations.

Or in the Results, or in the Conclusions something linked to the situation in Nigeria from this point of view and what are the forecasts for a higher rate of re-socialization and integration of juvenile offenders.

With these medium changes, the paper is ok for publishing.
