The manuscript scientifically is good and supports the fertilizer application on guar crop in different soil characterize to increasing production and productivity. 2. The title is suitable, clearer and itis reflect the content of the research 3. Abstract is comprehensive, but there are some of amend and correction was made by clear 4. All the subsections and structure of the manuscript appropriate accordingly to scientific write style. 5. Manuscript scientifically is correct 6. The references are sufficient and recent, but there are some of reference were missing (marked by red color)	
Minor REVISION comments **1. Is language/English quality of the article suitable for scholarly communications?**	The language of manuscript is good, clear and understandable	
Optional/General comments	- The research objectives are not mentioned in the introduction, and the research objectives must be stated clearly. - Introduction is too long, I suggestion to be not more than one and half pages - In the results and discussions, it is butter to mentioned the treatment as T_9. T_8, …. etc., no need to write the details of all treatment - The tables are many and overlapping and require more abbreviation and clarification. It is preferable to use diagrams for further explanation and clarification.
