If you have suggestion of additional references, please mention in the review form. <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	Yes it is important It may be considered if possible technically improve Abstract is not comprehensive, in results section results are not clearly mentioned. No in structure tables and graphs of results are given but not statistical results are mentioned, without statistical analysis results are not accepted. Scientifically every method used has a reference, which are not mentioned clearly, instruments and their models are not mentioned, methods of using apparatus is not clear, it has a ambiguity about the actual results. All the references don't carry same style, which is inappropriate, some references are very old, and they should be replaced with recent-ones. In results section statistical results are give with the support is previous studies, but unfortunately statistical methods are not used and not a single reference is used in the supporting of this study, which is technically improper.
