

Editor's Comment:

The reviewed manuscript (2024/ARRB/116512) entitled, "Toxicity of Two Therapeutants Hydrogen Peroxide and Formalin in Nile tilapia (*Oreochromis niloticus*)" for a final decision. I am pleased to read this interesting piece of research paper and found that the authors have done wonderful jobs in revising their manuscript based on the scholastic comments/suggestions raised by the reviewers as well as improving the manuscript in a good manner. However, there are still some minor mistakes/errors in wordings and languages as well as formatting/arranging of the whole manuscript including tables, figures and references, which need to be corrected/revised based on the prescribed guidelines of the journal before final printing. In addition, the scientific name of the fish should be written in *Italic* throughout the text including the title and abstract. Therefore, I recommend the manuscript for publication in Annual Research & Review in Biology with suggested revisions.
