	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	 1. Yes 2. Yes 3. can be improved 4. irregular and no clear structure 5. yes 6. some old ones can be changed	 Corrected the manuscript and highlighted with blue colour The conclusion section references were corrected and removed.
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	 Can be corrected especially thyphos	
Optional/General comments	Some of the grammatical errors in the work were changed by me and marked in red The discussion section could be more emphatic and comparisons with the literature could be more striking. MTX mechanism should be explained in detail and systematically and the results section should be revised. The result section is a unique section and using references is generally not recommended.	

PART 2:
